

Defining Rehabilitative Care

At the Southern New England Rehabilitation Center at Fatima Hospital, we've set the standard in rehabilitative care by bringing together an accomplished team of physicians, therapists and nurse professionals.

Working closely with referring physicians, we offer comprehensive and specialized rehabilitation for conditions including stroke, spinal cord and brain injuries, and hip fractures. Patients also benefit from outpatient wheelchair and videostroboscopy clinics.

Most importantly, we are committed to helping our patients and their families achieve their goals of recovery and independence.
